

**REMARKS****Overview**

Claims 21-51 are pending in this case. Claims 35-51 are new. Claims 21-26 and 32-34 have been amended. The Specification has also been amended to explicitly incorporate statements from the two provisional applications from which this application claims priority, and which were originally incorporated by reference.

**Amendments to the Specification**

The Specification has been amended by explicitly adding material from the provisional application or from one or more other references which have been incorporated by reference. It is respectfully submitted that these amendments do not add new matter.

The first amendment made to the Specification is at page 7, after paragraph 3. The first sentence added to the Specification here is from U. S. Provisional Application No. 60/162,094, page 5.

The Second, third and fourth sentence added to the Specification here are from U. S. Provisional Application No. 60/163,426, page 4.

The next addition is made to page 7 before the last paragraph. The addition here is from U. S. Provisional Application No. 60/220,749, page 5.

The next addition is made to page 8 before the first full paragraph. The addition here is from U. S. Provisional Application No. 60/162,094, Summary of the Invention, third paragraph.

The next addition is made at page 8, after the first full paragraph. The addition here is from U. S. Provisional Application No. 60/220,749, page 11. Also note that for clarity it is made clear the Attachment B reference is part of the provisional application.

The next addition to the Specification is made at page 9, after the first full paragraph.

The addition is from U. S. Provisional Patent Application No. 60/220,749, page 1.

The next addition to the Specification is within the paragraph spanning pages 14 and 15 of the original Specification. The addition made is a sentence from U. S. Provisional Patent Application No. 60/220,749.

The final addition to the original Specification is made at page 24, before the first paragraph. This addition is from U. S. Provisional Patent Application No. 60/220,749.

It is submitted that these amendments do not add new matter as the provisional applications were incorporated into the Specification by reference.

#### **Amendments to the Claims**

Claims 21-26 have been amended for clarity. Claims 32-34 has been amended to provide use of "at least one" structured linear database. Support for using multiple structured linear databases is clear at least from page 8, last paragraph which describes that structured linear databases can be used for "simultaneous use of any, or all, of the following: Internet, voice communication, radio transmission, HDTV and digital TV transmission, and/or raw data."

#### **New claims**

Claims 35-51 are new. Support for new claim 35 which requires "telecommunication data packets" is clear from page 9, first paragraph. Support for claim 36 requires a structured linear database to be "variable in length" which is clear from Chart 1 on page 13 and its description. Support for claim 37 which requires the "telecommunication data packets are variable in length" is also clear from Chart 1 and its description on page 13. Support for claim 38 which requires "one structured linear database is equivalent in duration to one telecommunication data packet" is also clear from Chart 1 and its description on page 13. Support for new

independent claim 39 is clear from the Specification as originally filed, including the original claims and the Abstract. Support for new claim 40 is also clear from at least the original claims and Abstract. Support for claims 41 and 42 is clear at least from the amendment adding language from U. S. Provisional Application No. 60/220,749 to page 9. Support for claim 43 is clear from pages 7-9 of the Specification. Support for claim 44 is found at page 7 of the Specification. Support for claim 45 is found from pages 5-8 and 11 of the Specification. Support for claim 46 is found at least at page 8, 10, 11, 14 and 15 of the Specification.

Support for claims 47-49 is found at least at pages 8, 10, 11, 14, and 15 of the Specification and the language from U. S. Provisional Application No. 60/220,749 (pages 1, 5 and 7) which has been added to the Specification. Support for claims 50 and 51 is found at least in U. S. Provisional Patent Application No. 60/220,749, pages 1, 5 and U. S. Provisional Patent Application No. 60/162,094 (Summary of the Invention, third paragraph).

Therefore, it is respectfully submitted that all new claims are supported and there is no new matter added.

### **Conclusion**

This amendment adds 11 additional claims over 20 (\$9.00 each). Therefore, please charge Deposit Account No. 26-0084 in the amount of \$99.00 for the new claims. No other fees or extensions of time are believed to be due in connection with this amendment; however, consider this a request for any extension inadvertently omitted, and charge any additional fees to Deposit Account No. 26-0084.

Respectfully submitted,

John D. Goodhue
